

BOILERPLATE 1 (2020 - 2021)

Phase3 Telecom is a leading independent fibre optic infrastructure with Points-of-Presence (POPs), colocation, and NOCs in Nigeria. Issued a National Long Distance Operator (NLDO) license in 2003 by the Nigerian Communications Commission (NCC), and with a vibrant as well as a dedicated team of experienced professionals, we are the network of choice for high-performance, data-intensive and low latency connectivity that span dedicated internet access, MPLS VPN, metro ethernet, wide area network solutions e.t.c. Currently, we operate across the ECOWAS region as well as international markets through strategic partnerships that allow us to connect our clients across 400 cities worldwide. And ours is an extensive and secure network with end-to-end capabilities that service providers and businesses can rely on to scale, manage costs and assure efficiency. As our network continues to evolve into other layered service streams including cloud-based and network security solutions – our invaluable clients will continue to remain the core of every investment that we make; innovation that we create; and technology that we adopt during the 4th industrial revolution to position us as the network of the future. BOILERPLATE 2 (2022)

Phase3 Telecom is a leading independent fibre-optic infrastructure with Points-of-Presence (POPs), colocation, and Network Operation Centers (NOCs) across Nigeria. Issued a National Long Distance Operator (NLDO) license in 2003 by the Nigerian Communications Commission (NCC), and with a vibrant as well as a dedicated team of experienced professionals - we are the network of choice for high-performance, data-intensive and low latency connectivity that span dedicated internet access, MPLS VPN, metro ethernet, wide area network solutions e.t.c. Currently, we operate across the ECOWAS region including Ghana, Benin Republic, Togo Niger, Cameroun and Chad as well as international markets through strategic partnerships that allow us to connect our clients across 400 cities worldwide. Ours is also a reliable, extensive and secure network covering thousands of kilometers with end-to-end capabilities that service providers and businesses can rely on to scale, manage costs and assure efficiency. And as our network continues to proffer more cost-effective connectivity including VSAT services as well as to digitally transform and evolve into other layered service streams that help businesses thrive - our invaluable clients will continue to remain the core of every investment that we make; innovation that we create; and technology that we adopt during the 4th industrial revolution to position us as Africa's digital infrastructure and network of the future.
