Phase3 telecom

Connecting networks, businesses and people ...

WELCOME TO THE NETWORK OF THE FUTURE...

DIGITAL
INFRASTRUCTURE

INTRODUCTION

At Phase 3, we know the value of customers. We also express it with every contact. We understand that our client companies feel the same way about their own customers that's why we keep improving our customer experience.

We have taken a major step forward in meeting our ongoing goal of providing customers with a great customer experience by enhancing our business portal. Now, you can chat with a live customer care representative on our website as well as connect with us on Facebook, Twitter, and Linkedin.

You can always enjoy our services on our robust and reliable Open Access Network as well as reach us with ease whenever and wherever!

Phase3

OUR CULTURE

● **CUSTOMER CENTRISM**

Our clients make us who we are and we make sure everyone knows it.

● **RESULT ORIENTED – PEOPLE DRIVEN:**

At Phase 3, we are obsessed about results BUT never forget that those results are produced by PEOPLE we respect, encourage, celebrate and bond with.

● **EQUITY AND FAIRNESS:**

At every level, we strive to treat our team fairly and underscore our decisions with the principle of equity.

● **SOPHISTICATION:**

We reserve the right to be bold and loud but in manner, character and style… sophistication is our watchword.

● **INFORMATION SHARING:**

Open door and open information sharing for us is no cliché…it is a FACT. But we are strongly guided by the principle of confidentiality on the uniquely personal.

● **RESOURCEFUL LEARNING**

Learning for us is a lifestyle not an event and we think outside the box to make it happen.

● **TEAMWORK:**

Faced with a choice, we choose the team over the individual always. Even while recognizing individual contributions; we champion team efforts.

● **CONFIDENCE:**

We exude it. We are a courageous team always ready to take on challenges.

VISION

To deliver the most reliable backbone infrastructure; offering broadband solutions with unparallel customer support.

MISSION

We are committed to providing excellent services to connect people and businesses for the socio-economic development of Africa.

Phase3

03

VALUE STATEMENT

● **PROFESSIONALISM:**

Taking pride in demonstrating competence in our area of expertise, and in ALL situations as well as displaying a commitment to excellence and high standards of achievement.

● **TRANSPARENCY:**

Conducting ourselves with openness and candour, displaying behaviours synonymous with integrity, honesty, forthrightness and accountability.

● **DOGGEDNESS:**

Displaying the drive and determination to diligently seek to (through resourcefulness and perseverance) provide our customers with quality service and/or product irrespective of obstacles.

● **RESILIENCE:**

Being responsive to change, viewing problems and challenges as opportunities, learning from mistakes and displaying a dogged determination to succeed.

● **TEAM WORK:**

Faced with a choice, we choose the team over the individual always. While we promote and reward individual contributions; we are greater champions of team effort.

OUR PEOPLE

Phase 3's greatest advantage is the people in the company.

From the beginning, Phase 3 was founded on the principle of creative leadership. Our Open Access Network was built with our innovative culture as its foundation and people as pillars. We value our people, recognize their efforts, and reward results. Regardless of position, we look for and only hire those with the " Phase 3 Traits".

Our people are those who bring a positive attitude to work daily and who have the desire to be part of a winning team.

A people you can rely on to bring business technology to life by offering services of value.

Phase3

BRAND PROMISE

We are dedicated to making a difference in the world through what we do and decisions we make. Reliability, quality and excellence are what we live for.

This forms the basis of our commitment to enhancing the availability of fast and reliable internet to the unserved and the underserved parts of West Africa.

Voted 2020 PanAfrican Broadband for Enterprise Solution Provider and "National Fiber Infrastructure Provider of the Year" for three consecutive years by prestigious industry analysts and watchers; our ongoing huge expansion projects is set to deliver additional fibre infrastructure in 2020 and beyond.

Visit **www.phase3telecom.com** to learn more about the future of Africa's Broadband.

Phase3

A Bold Intervention

Phase3

# OUR FIBRE OPTIC CABLES ON HIGH VOLTAGE TRANSMISSION LINES

Almost every village and small community in Nigeria, and West Africa as a whole, is connected to the electricity distribution lines.

This connection is carried on high voltage power lines stretching out across welds to the nearest electricity substation.

Phase 3 took the initiative to use fibre optic cables on power lines to carry high speed broadband connectivity starting from Nigeria to other parts of West Africa. Phase 3 pioneered this technological advancement in West Africa because of speed, security and cost. It is always much, much quicker to install fibre optic cables by attaching it to high voltage power lines than it is to dig trenches to bury it underground. Our fibre optic cables on high voltage transmission lines have developed an excellent reputation for security and reliability.

Our fibre optic cables on high voltage transmission lines are not subject to 'digups' and vandalization as its common with underground cables, one major cause of communication breaks in GSM and large Internet Service Companies.

And, finally, our fibre optic cables on high voltage transmission lines ensure shorter payback times for our customers thereby increasing their profit margin.

07

Phase3
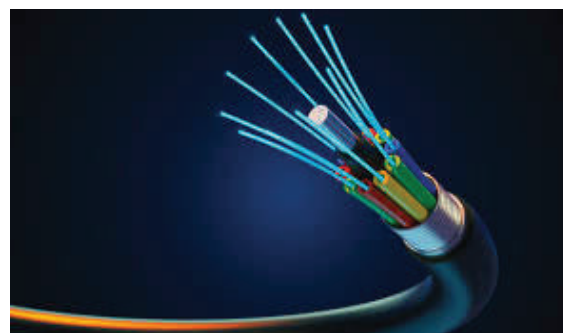

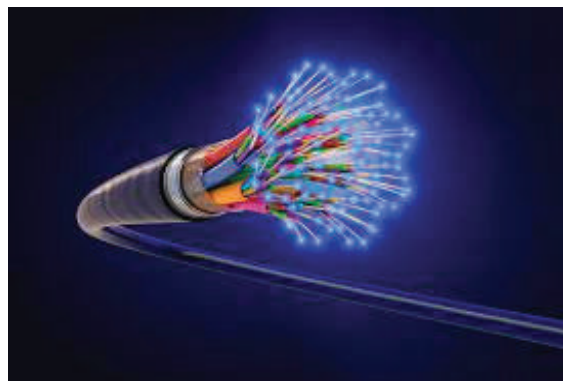

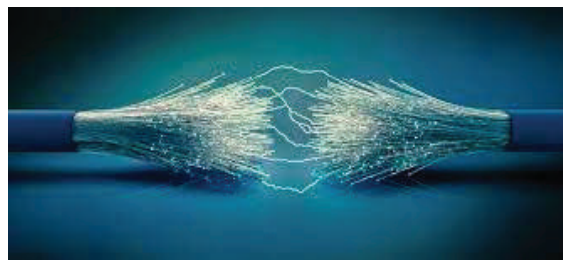

CONNECTIVITY SERVICES

Connectivity is the basis of all business communication. Everything, from email, web access, networking, bandwidth-intensive data transfers, backups, video conferencing, and specialised applications rely on connectivity.

With our connectivity solutions, you stay connected always, increase collaboration and share resources with your employees and customers. Gain complete control of all your business information and communications with access to a trusted network.

Benefits & Features

✓ Reliable, scalable and flexible solutions with high availability

✓ Securely link multiple sites, off-site employees, suppliers and partners locally and abroad

✓ Fast and seamless setup

✓ 24hrs proactive monitoring and support

✓ Cost-effective solutions for all-sized businesses

Fibre Network

Phase 3 is West Africa's largest independent fibre optic infrastructure and telecommunications services provider. With coverage of 10,000km and counting, we are licensed to run our network on Nigeria's power infrastructure with expansion into the ECOWAS region using our unique Right of Way (RoW). We are headquartered in Abuja with multiple local and regional offices where our vibrant and dedicated team drive a fast growing efficient, affordable and reliable backbone that service many of the region's largest telecommunications operators, internet service providers (ISPs), government institutions, schools, universities , multinationals, corporate organizations, small businesses, hospitals and residences; in Nigeria and West Africa Sub-Region. Our current service offering and seamless communication solutions cover transmission and broadband that allow our clients to enjoy network access to over 400 cities worldwide through a global partnership with PCCW Global, the Hong Kong headquartered international operating division of HKT Hong Kong's premier telecommunications service provider.

08
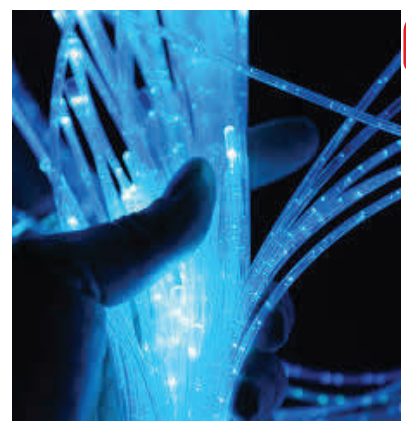

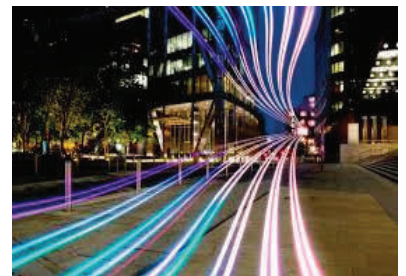

Phase3

Dark Fibre

Phase 3's rapidly expanding network is designed with available fibre optic cables for lease to other networks. Leasing our dark fibre comes complete with a customized service that allows you to configure network components, to fit your unique requirements which put you in complete control of your network.

Benefits & Features

- ✔ Complete user control
- ✔ Availability and reliability
- ✔ Low attenuation levels in line with International Telecom Union (ITU) specifications

- ✔ Rapid response time for maintenance
- ✔ Complete user control
- ✔ Polarization Mode Dispersion (PMD)

- ✔ coefficient less than 0.2ps/km
- ✔ Chromatic Dispersion (CD) coefficient less than 17ps/km
- ✔ Average fibre attenuation usually less than 0.24dB/km

Dedicated Internet Service (DIS)

We guarantee dedicated bandwidth over a 100% fibre connection with up to 99.9% service availability through our unique aerial right of way. Whatever the medium, we deliver the IP needs of our clients from 1Mbps to the highest capacity required at very high Quality of Service (QoS).
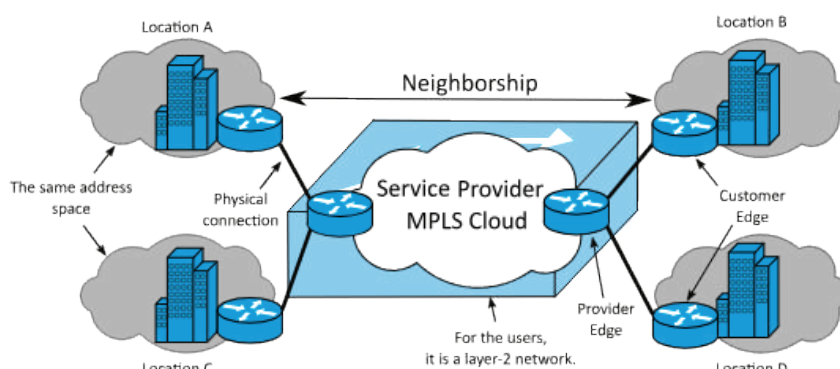

Benefits & Features

- ✔ Redundancy on the international gateway and hinterland connectivity with multiple traffic diversity
- ✔ Full duplex dedicated internet at 1:1 Contention ratio

- ✔ 24/7 Customer Support and Network Monitoring
- ✔ Reliability due to less fibre cuts

- ✔ Single 8 IP block with 6 useable public IP addresses

Phase3

MPLS-Based VPN Services

Phase 3 delivers a private, secure, intelligent and cost effective service for corporate customers with large market coverage comprising of several branches in different locations which need to be connected over a Virtual Private Network (VPN).

Our VPN service enabled by MultiProtocol Label Switching (MPLS) technology allows for easy connectivity of various customers at multiple locations, thereby reducing your network costs, and simplifying both network design and overall administration.

Fibre To The X (FTTX)

Either to the home, estate, building or "X location", Phase 3 through our Passive Optical Network (PON) can deliver broadband needs over optical fibre to you

Benefits & Features

- ✓ Space utilization
- ✓ Low power consumption
- ✓ Shorter installation time
- ✓ Highly scalable with upgrades done in no time

- ✓ Cost effectiveness due to reduced CapEx and OpEx
- ✓ Low maintenance due to use of passive network components

- ✓ High availability due to less points of failure
- ✓ High reliability due to reduced trunk rolls

Phase3

International Private Leased Circuit (IPLC)

We offer a dedicated endtoend International Private Line (IPL), delivered over our global optical footprint for your business critical applications requiring connectivity across geographically dispersed locations around the globe.

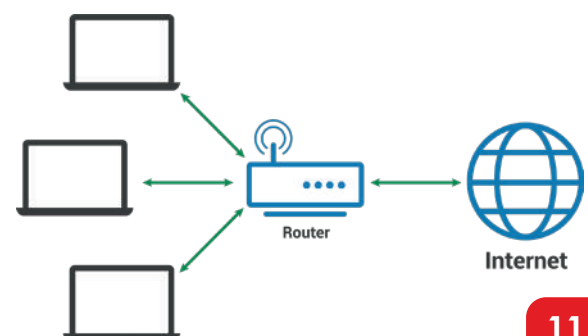

Benefits & Features

✔ Reliable Internet access for business data exchange, video conferencing, and any other form of global telecommunication.

✔ Low latency in transmission speed

✔ Guaranteed bandwidth

✔ High resiliency with multiple redundant links.

Local Area Network (LAN)

Phase 3 delivers seamless and reliable Local Area Network (LAN) services designed to meet your organization's connectivity needs. Whether you require wired or wireless solutions, we have you covered. Our comprehensive LAN services span from initial network planning and design to expert implementation and ongoing maintenance, ensuring that you extract maximum value from your Wide Area Network (WAN) connectivity right from the start.
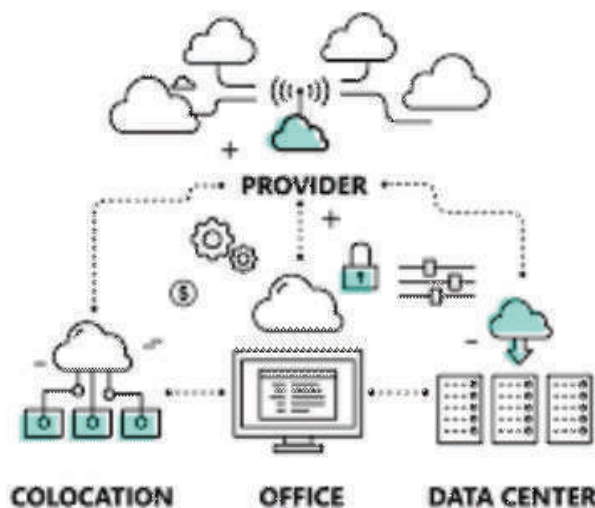

Benefits & Features

✔ Versatile deployment options for LAN connectivity

✔ End-to-end LAN services, ensuring optimal performance

✔ Seamless integration with WAN for a unified network experience

✔ 24/7 Service Support

Phase3

Co-location

This is a cost effective service which provides you with facilities fitted to house your servers and other ICT infrastructure with full complement of uninterrupted power supply, cooling, fire suppression, connectivity, network security and surveillance.

Benefits & Features

✔ Uninterrupted power supply ✔ Fire suppression Connectivity ✔ Cooling ✔ Network security and surveillance.

Wide Area Network (WAN)

At Phase 3, we understand the critical role a Wide Area Network (WAN) plays in modern business operations. Our comprehensive WAN services are designed to empower your organization with seamless connectivity, efficient data transmission, and robust network management capabilities.
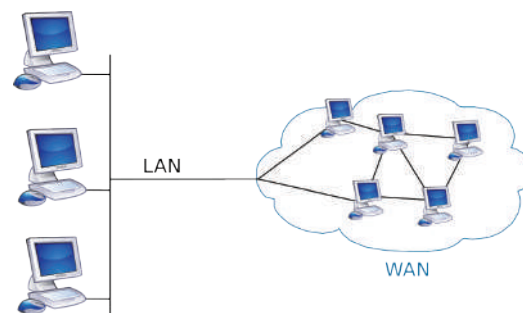

Benefits & Features

✔ 24/7 Service Support
✔ High-Speed Delivery
✔ End-to-End Service
✔ Customized Network Planning & Design
✔ Optimized Performance
✔ Scalability

12

Phase3

Managed Services

Our managed service solution comprises Network Operation Centre (NOC) management, technical support management, field level maintenance management, and change management with customized service management processes. We provide a modular managed service delivery and an end-to-end service fulfilment and assurance which give our customer the capability to focus on their core business while network service level agreement in terms of availability, reliability, MTTR are strictly adhered to.

With our Managed Service delivery, we become an extension of your organization out here. You get our comprehensive network management solutions delivered by our team of experts on the ground. Available 24 hours a day, 365 days a year, we'll be here to take care of you.
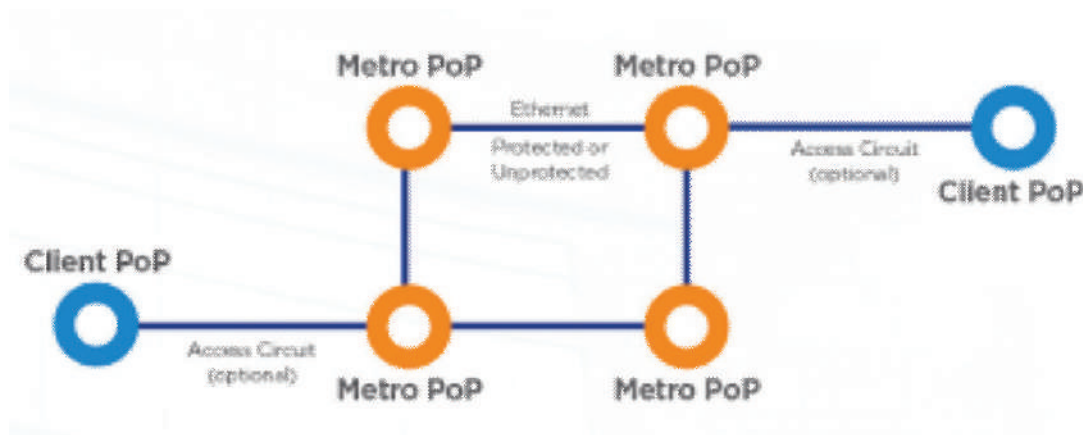

Benefits & Features

✔ Reliability
✔ Cost effectiveness

✔ Scalability
✔ Wide metro footprint

Metro Connectivity

Whether you require point-to-point or point-to-multipoint connectivity within the metro, Phase 3 has a metro- connectivity solution (Ethernet and fibre) that fits your desired architecture.

Benefits & Features

✔ Reliability   ✔ Cost Effectiveness   ✔ Scalability   ✔ Wide Metro footprint

Phase3

Satellite Broadband

Broadband Internet without Terrestial Infrastructure

Phase 3 delivers upstream (outgoing) & downstream (incoming) data to and from any smart device (mobile phone, tablet, TV, computer, etc.)

with WiFi capacity through a high throughput satellite enabling you to instantly connect to the Internet via a small satellite dish and modem, anywhere within the coverage area.

Because we don't depend on terrestrial infrastructure, you can enjoy uninterrupted access to our Internet services throughout Nigeria.

Your satellite dish can be mounted on a roof, wall or via pole mount on the ground.

Once connected, your computer sends a request to the Phase 3 modem that passes the request to the satellite.

The satellite receives this signal and sends it to one of the Phase 3 gateways. The request then goes to the Internet backbone, which retrieves the requested web content from the web server. The whole cycle is then reversed and the requested data is sent to the end-user.

Depending on your location and the corresponding beam, our Ka-band satellite will route your incoming and outgoing traffic to and from the respective gateways.

So, in a nutshell, Phase 3 simply work as follows:

Your smart device sends a signal request through your modem to your satellite dish and then up to our orbiting satellite, which, in turn, sends a signal to us. We then transmit the signal back to the satellite, to your dish, your modem, and finally, your smart device. All of this happens in less than half of a second!

High Speed, Low Latency Satellite Internet
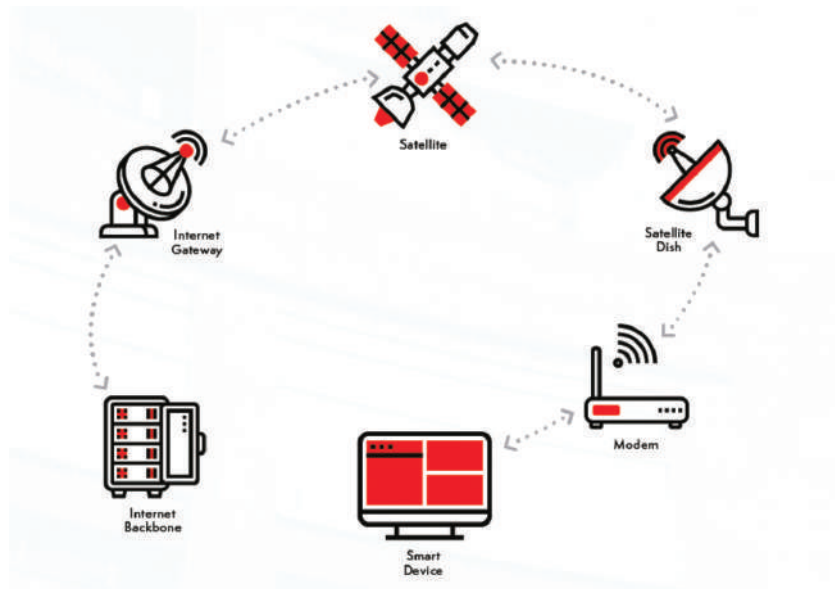

We are dedicated to making a difference in the world through what we do and the decisions we make. Many areas in Nigeria still experience difficulty accessing reliable internet connection due to factors like distance from copper infrastructure and electrical outages that cause interference to mobile phone networks. Currently without consistent terrestrial infrastructure, devices do not experience reliable internet connection.

Phase 3 offers cutting-edge broadband satellite internet solutions that overcome these obstacles and turn homes and businesses into hubs of connectivity. As one of Nigeria's leading satellite broadband providers, Phase 3 delivers fast and reliable internet solutions nationwide.

Experience dramatic benefits in your business – from agricultural enterprises, mining operations and NGOs to small business organizations – by accessing information anytime, from anywhere, improving your company's performance, speeding up your business processes and enhancing your bottom line.

Enrich your family with all the advantages that our reliable, high-capacity Internet has to offer – e-learning, online banking & shopping, entertainment, and staying connected to family & friends from all over the world.

Phase 3 offers a range of connectivity products – you can work, connect, watch, listen, play, post, and chat – the opportunities are endless!

We believe that every Nigerian deserves the opportunity to be online, and that is why our satellite connectivity solutions come in varying options so that our subscribers can enjoy uninterrupted unlimited or capped access to the Internet with a package to suit both their needs and their pockets.

The advantages of satellite connectivity with Phase 3

✔ Cost effective   ✔ Flexible data options   ✔ Multiple sessions

Phase3

Satellite Internet for Home

Internet access in Nigeria can be poorly affected by the often significant distances from the local copper infrastructure, mobile towers, and electricity outages.
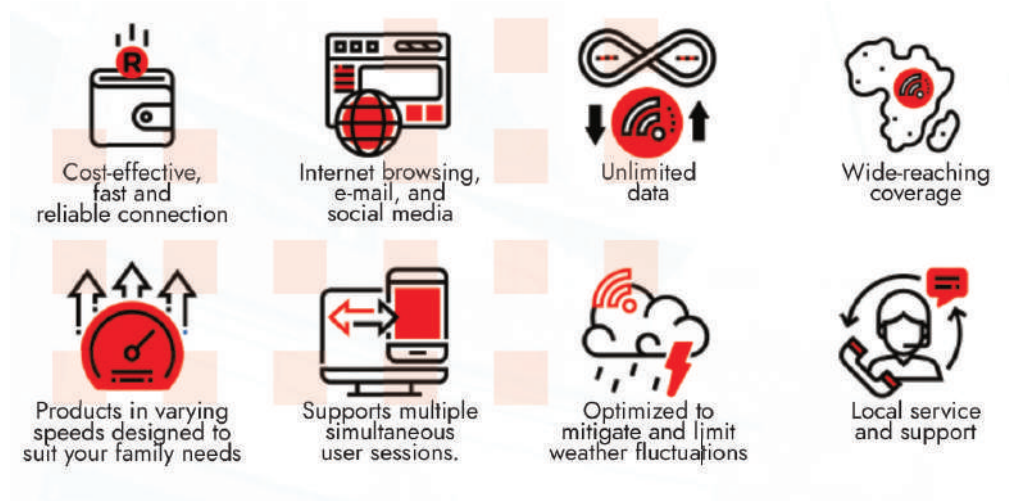

Phase 3 offers cutting-edge broadband satellite solutions that transform your home into a hub of connectivity for your family.

As one of Nigeria's premier satellite broadband providers, Phase 3 delivers reliable, cost-effective, and fast internet solutions to homes nationwide – no matter the location or situation. We believe that every home deserves satellite connectivity to meet both your internet requirements and your budget.

Enrich yourself and your family with all the advantages reliable, high-capacity Internet offers. Shopping, e-learning, online banking, entertainment, and so much more are at your fingertips when you sign up for one of our affordable packages.

With our range of connectivity products, you can watch, listen, play, post, work, and chat – the opportunities are endless!

Key Benefits and Applications

Cost-effective, fast and reliable connection	Internet browsing, e-mail, and social media	Unlimited data	Wide-reaching coverage
Products in varying speeds designed to suit your family needs	Supports multiple simultaneous user sessions.	Optimized to mitigate and limit weather fluctuations	Local service and support

**Phase3**

Satellite Internet for Business

Phase 3 empowers you to enhance your business performance and potential by providing reliable, high-capacity Internet solutions that provide instant access to online resources critical for business development, growth and success.

Whether you are an agricultural enterprise, an NGO, a mining operation, or a small business, Phase 3 has a broadband connectivity product to meet your budget and boost your bottom line. Our solutions support email, web access, and various business applications, either as a primary or backup solution for existing terrestrial Internet during network failures.

Review our product selection to find the most appropriate solution to suit your business needs

We offer a competitive advantage that enables your business to increase productivity, facilitate sharing of information with customers, partners, and suppliers and gain access to new markets.

Key Benefits and Applications

Fast, reliable and cost-effective connection

Internet browsing, e-mail, and social media

Unlimited or Capped data

Wide-reaching coverage

Products in varying speeds designed to suit your business needs

Supports multiple simultaneous user sessions.

Optimized to mitigate and limit weather fluctuations

Local service and support

Phase3

Experience...
PHASE 3

Experience Reliability

Phase 3 delivers "always-on" Internet to your business and home. This means that your business can keep connected to its customers, and the business community while improving your bottom line (something which is often lost as a result of unpredictable connectivity).

Stay connected and in touch at all times. That's good for security, entertainment, online shopping and so much more.

In addition to this, Phase 3's cutting-edge Ka-band satellite connectivity is optimized to mitigate and limit weather fluctuations. And because we are wireless, our Internet solutions are impervious to cable damage or infrastructure theft! We reach areas not reached by other internet providers because we are not dependent on infrastructures like fibre or cell towertt
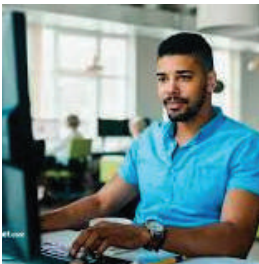

Experience Accessibility

Our Satellite Internet Solutions are able to provide coverage even to remote locations. We not only connect businesses to global markets over the internet, but we also keep loved ones connected.

Experience High Capacity & Dependable Speed

Phase 3's Ka-band satellite services encompass cutting-edge technology and superior satellite bandwidth – providing your business and home with high capacity and dependable internet speed.

Phase3

Experience
Unlimited Access to Skills, Tools, Markets and Entertainment

Phase 3 's high-speed Internet solutions bring all the advantages of the Internet to your doorstep.

Whether for business or pleasure, subscribing to Phase 3 is a game-changer!

From a business perspective, our high-speed solution is the gateway to data-rich online applications that deliver high-performance operational efficiencies, like online banking, online shopping, entertainment, smart farming, tourism platforms, precision agriculture, and many more. You can even discover new business opportunities and benefit from increased market access!

At home, you can invest in yourself through e-learning, professional updating, and

Experience
Cost-Effective Pricing

Phase 3 offers highly affordable solutions. You just need a dish, a router, and a subscription that best suits your needs.

Experience
Local Service

Phase 3 partners with local businesses because we know that investing in your community is important to you.

We do this by providing business opportunities and training to local businesses as an opportunity to diversify their revenue streams while at the same time uplifting and servicing their local community, with a dedicated contact centre to assist.

This model ensures that your business and family invest in your community by supporting a local business.

Phase3

Data Centre

Phase 3's data center deliver services help customers optimize the operational and capital costs of maintenance of the IT infrastructure. We incorporate model technology that rightly support and provide excellent processing, storage, networking, management and the distribution of data within your company.

Our data center services cover hardware installation and maintenance; managed power distribution, backup power systems , databackup and archiving , managed user authentication and authorization, diverse fire walls and anti-malware programmes; managed outsourcing; managed business continuance and continuous efficient technical support. At Phase 3, we meet your data center needs effectively and in real time.

22

Phase3

West Africa
One Cable

West Africa One Cable is a Phase 3 cable that has become the preferred communications service of guaranteed reliable and affordable telecommunications capacity services to businesses and institutions through an IP backbone open access network across the West African Region.

West Africa One cable offers our clients channel circuits to any destination on International Private Lease Circuit (IPLC) fiber facilities for services across the West African region. Our promise is focused on providing clients with consistent low latency, secure, cost effective and reliable connections with direct access to the Internet resulting in improved productivity. We also offer the best technical support of world-class.

23

Digital
Solutions

Enterprise Solutions

Unified Communications

In today's fast-paced business environment, staying productive and competitive requires the right communication and collaboration solutions. Phase3 offers a comprehensive suite of Unified Communication and Collaboration (UC&C) services designed to empower your workforce, whether they're in the office or working remotely. Our integrated solutions enable your teams to collaborate seamlessly across business divisions and geographical boundaries, resulting in shorter product and project development cycles.

Benefits & Features

✓ Improved productivity

✓ Enhanced competitiveness

✓ Seamless remote work capabilities

✓ Efficient cross-functional and cross-border collaboration

✓ Accelerated product and project development cycles

Voice Over IP

Our Voice Over IP (VOIP) services enables customers to access a live representative while browsing a website. Online payment has transformed the financial services industry in an amazing way. Customers prefer to make payments online without leaving their businesses and homes. Phase3 can help financial firms face the challenges with network scalability and fast provision in bandwidth, reliable and high connectivity.

Benefits & Features

✓ Enhanced customer support and engagement

✓ Streamlined online payment processes

✓ Scalable network solutions

✓ Rapid bandwidth provisioning

✓ Dependable and high-quality connectivity

✓ Tailored solutions for financial firms

Video Conferencing

Executives from leading companies are embracing the benefits of enterprise video conferencing. Video conferencing encourages and supports learning, collaboration and communication and brings company leaders into the room with their teams and employees regardless of location — with far better engagement than audio conferencing alone. Phase 3 solutions allow businesses to face the challenges of a global economy in a cost-effective way.

Benefits & Features

✓ Facilitates effective learning, collaboration, and communication

✓ Bridges geographical gaps, connecting teams and leaders

✓ Boosts engagement compared to audio conferencing

✓ Enables global business operations

✓ Cost-effective approach to address global economic challenges

Phase3

eSolutions

eLearning

With the innovative and ongoing evolutionary nature of technology, the education sector has to keep a sharp focus on enhancing the services it provides to students, administration and faculty, Highspeed internet connection is required for research, teaching, and administration. Our highspeed internet service will improve the educational experience.

eBroadcast

Our reliable Fibre Optic Broadband infrastructure is a platform for efficient
WiFi services that helps you broadcast events as it happens. Our Open Access Network offers nextgeneration digital connectivity at event venues. People demand the ability to watch their sports, entertainment and special events anytime, anywhere, and on any device. Partner with Phase 3 to leverage our robust Fibre Optic broadband infrastructure.

ePayment

Our VOICE Over IP (VoIP) services enables customers to access a live representative while browsing a website. Online payment has transformed the financial services industry in an amazing way.
Customers prefer to make payments online without leaving their businesses and homes. Phase 3 can help financial firms face the challenges with network scalability and fast provision in bandwidth, reliable, and high connectivity.

Phase3

eGovernment

Citizens expect quick, reliable communication with their government.
Government officials also expect secure access to each other and to critical data.
Your challenge is to satisfy both expectations. Where do you turn? Phase 3!
Our proven and secure Open Access Network has made us one of the top government communication providers.

eVoting

In this electronic age, we help make it easy to practice democracy. Our robust and reliable Open Access Network enables operational continuity, bulletproof security and cost effective transition to a new, more measurable, and efficient electoral process.
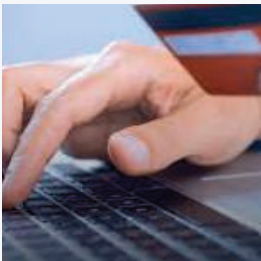

eBanking

Competition in the financial industry is growing by the second financial institutions are searching for network solutions that can keep pace with rising customers' demands.
Phase 3 enables highspeed connectivity and transport of critical data on a robust and reliable Open Access Network.

27

eCommerce

Connecting financial firms to the opportunities of today and the potential of tomorrow is one of our objectives for the financial sector. We give you and your customers the power to transact business across geographical areas with the speed of light. It's not always about how you are connected, but also whom you are connected to. Your connection to Phase 3 keeps you ahead of tomorrow.

eHealth

Increasingly, patients and medical practitioners turn to the internet for information on disease symptoms, diagnoses, and medical facts. More and more, they are using the internet to find answers. The healthcare industry can work with Phase 3 to prioritize what kind of information and health care data is available, how to deliver that information online and to develop a health care network strategy for best serving their customers.

eProcure
(Electronic Procurement Management Platform)

We built a system to create, capture, manage, distribute, and archive different forms of documents. Our EDMS solution offers multisource information capture, storage, tracking and easy document search. We adopt SharePoint, hardware and other applications to deliver on this solution.

Benefits & Features

✔ Automation of processes   ✔ Improved operational efficiency

✔ Paperless Office   ✔ Staff remote operation support

Phase3

Digital Banking

At Phase 3 we believe in putting you in control of your finances. With our innovative mobile banking app and website, you can easily access and manage your bank accounts, view real-time balances, transfer funds, pay bills, and even apply for loans and credit cards. Our robust security measures ensure that your transactions are safe and your information is protected. We also offer a range of value-added services, such as mobile payments, budgeting tools, and investment options, to help you achieve your financial goals.

With Phase 3 Digital Banking, banking has never been easier or more convenient.
Join us today and experience the future of banking at your fingertips.

Mobile

Phase 3's Digital Banking mobile app and website provide convenient and accessible banking services on the go. With our mobile payment options, budgeting tools, and mobile check deposit feature, you can easily manage your finances and make secure transactions from your mobile devices.

Stay informed with mobile banking alerts and enjoy the flexibility of accessing bank or loan services without the need for extensive documentation.

Benefits & Features

✓ Mobile payment options for convenient and secure transactions

✓ Budgeting tools for better financial management

✓ Mobile check deposit for easy and efficient check handling

✓ Mobile banking alerts for real-time account activity notifications

✓ Access to bank or loan services without extensive documentation

Phase3

Travel

Introducing Phase 3's Digital Banking travel services, your one-stop solution for hassle-free travel bookings and plans. Whether you're traveling for business, holiday, or school, our partnership with leading airlines ensures seamless flight bookings and reliable travel experiences. With travel insurance coverage and a user-friendly website/app, you can travel with peace of mind, knowing that all your travel needs are taken care of.

Benefits & Features

✓ Easy and convenient travel bookings for flights and accommodations

✓ Comprehensive travel insurance coverage for peace of mind

✓ Partnership with leading airlines for reliable and efficient travel experiences

✓ User-friendly website and app for seamless travel planning and booking

✓ Access to travel FAQs for quick and helpful

Partnership

Phase 3's Digital Banking offers partnership services, aimed at providing easy technology solutions for organizations, SMEs, airlines, and more. With our secure and transparent solutions, you can manage your business transactions, accounting, and assets with confidence.

Personalize your account and gain access to our innovative Digital platform for efficient transaction logging, tracing, and generation.

Phase3

Mobile Virtual Network
(MVNO)

At Phase 3, we understand the importance of seamless connectivity in today's fast-paced world. That's why we have built a robust network infrastructure that ensures reliable and uninterrupted communication, allowing you to stay connected wherever you are. Whether you're making important business calls, staying in touch with loved ones, or accessing critical information on the go, our MVNO services provide the convenience and reliability you need.

Our commitment to innovation is at the core of everything we do. We continuously strive to bring you the latest advancements in mobile technology, allowing you to take full advantage of the digital era. From cutting-edge smartphones to high-speed data connections, our services are designed to empower you with the tools and capabilities to thrive in today's digital landscape.

31
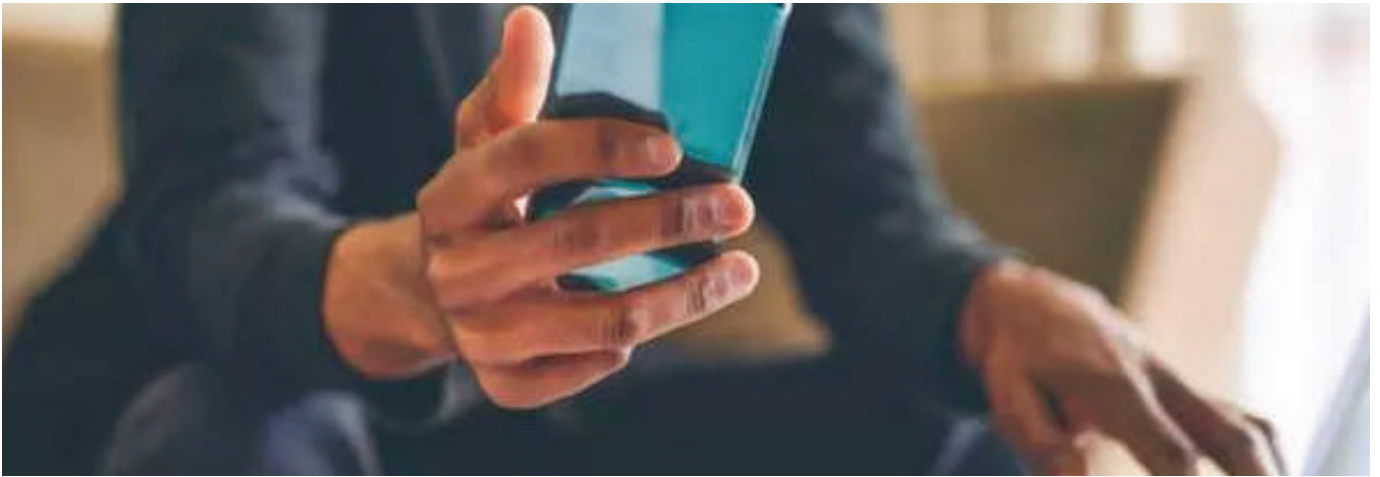

Data Roaming Packages

For frequent travelers, staying connected while abroad is essential. With Phase 3 MVNO's tailored data roaming packages, you can enjoy seamless connectivity and cost-effective options wherever you go. Say goodbye to exorbitant roaming charges and stay connected with colleagues, friends, and family no matter where you are in the world.

Benefits & Features

✔ Cost-effective data roaming options to avoid unexpected charges.

✔ Reliable and high-speed data access while traveling internationally.

✔ Seamless connectivity for browsing, communication, and accessing important information.

✔ Convenient package options based on your travel duration and data requirements.

✔ Peace of mind knowing you can stay connected without worrying about excessive costs.

IOT Solutions For Enhanced Connectivity

The Internet of Things (IoT) has transformed the way businesses and individuals interact with technology. Phase 3's MVNO offer comprehensive IoT solutions that empower you to connect and manage a wide array of devices, sensors, and machines. Unlock the potential of data-driven decisions, process automation, and the creation of new business models with

Benefits & Features

✔ Connecting and managing devices, sensors, and machines for businesses.

✔ Real-time monitoring and control of assets for operational efficiency.

✔ Efficient resource management through IoT data insights.

✔ Data-driven decision-making for improved business strategies.

✔ Operational optimization and automation for streamlined processes.

Phase3

Value Added Services
VAS

We go beyond basic connectivity to enhance your mobile experience. Our value-added services provide ersonalized and enriching features, catering to your interests and preferences. From access to premium content and exclusive entertainment options to additional security features, we ensure that your mobile experience goes beyond just connectivity.

Enhanced Security Features

Your privacy and security are our top priorities. As part of our value-added services, we provide enhanced security features to protect your device and personal data. Benefit from mobile antivirus software that safeguards your device from malware and other online threats. Enjoy the peace of mind of secure VPN connections that encrypt your internet traffic and protect your online privacy. Additionally, our device tracking capabilities help you

Future-Ready Solutions

At Phase 3,, we are committed to preparing you for the future. We continuously monitor industry trends and invest in emerging technologies to ensure that you stay ahead of the competition. By partnering with us, you gain access to ongoing innovation, including edge computing for faster processing and response times, harnessing the potential of artificial intelligence for automation and data analysis, and exploring augmented reality applications for enhanced user experiences.

Benefits & Features

✓ Ongoing monitoring of industry trends to stay ahead of the curve.

✓ Investment in emerging technologies for future-proof solutions.

✓ Adoption of edge computing for faster processing and response times.

✓ Harnessing the potential of artificial intelligence for automation and data analysis.

✓ Exploring augmented reality applications for enhanced user experiences.

Entertainment

At Phase 3 we believe in putting you in control of your finances. With our innovative mobile banking app and website, you can easily access and manage your bank accounts, view real-time balances, transfer funds, pay bills, and even apply for loans and credit cards. Our robust security measures ensure that your transactions are safe and your information is protected. We also offer a range of value-added services, such as mobile payments, budgeting tools, and investment options, to help you achieve your financial goals.

With Phase 3 Digital Banking, banking has never been easier or more convenient. Join us !

Video Streaming

Dive into a world of entertainment with our video streaming service. Stream your favorite movies, TV shows, and exclusive content anytime, anywhere. Enjoy high-quality video playback, multiple device compatibility, and the convenience of on-demand viewing.

Discover a wide range of genres, including action, romance, comedy, documentaries, and more. Stay up to date with the latest releases and binge-watch your favorite series with our video streaming service.

Benefits & Features

Diverse Game Collection: Access a diverse collection of movies, TV shows, and exclusive content from various genres, ensuring there's something for every viewer.

On-Demand Viewing: Enjoy the convenience of on-demand viewing, allowing you to watch your favorite content at any time that suits you.

High-Quality Video Playback: Experience high-quality video playback with crisp visuals and immersive audio, enhancing your overall viewing experience.

Multi-Device Compatibility: Stream videos on multiple devices, including smartphones, tablets, smart TVs, and computers, giving you the flexibility to enjoy content on the device of your choice

Latest Releases and Binge-Watching: Stay up to date with the latest movie releases and TV show episodes, and binge-watch your favorite series from start to finish.

Music Streaming

Immerse yourself in the world of music with our exclusive music streaming service. Gain access to a vast library of songs from various genres, artists, and languages. Enjoy ad-free listening, create personalized playlists, and discover new music recommendations based on your preferences.

Whether you're into the latest hits, timeless classics, or niche genres, our music streaming service ensures that you always have the perfect soundtrack for every moment.

Benefits & Features

Vast Music Library: Gain access to a vast library of songs from various genres, artists, and languages, ensuring there's something for everyone.

Ad-Free Listening: Enjoy uninterrupted music playback without any ads, allowing you to immerse yourself in the music without interruptions.

Personalized Playlists: Create personalized playlists based on your preferences, moods, and occasions, making it easy to have the perfect soundtrack for any moment.

Discover New Music: Get personalized recommendations based on your listening history, helping you discover new artists, songs, and genres that match your taste.

Cross-Platform Compatibility: Enjoy seamless music streaming across multiple devices, including smartphones, tablets, and computers, giving you the flexibility to listen anywhere, anytime.

CYBER SECURITY
SECURITY OPERATION CENTRE (SOC)

For us, connectivity/solutions without security, is a risk to businesses. Hence, we provide specialized security solutions that are focused on "people", "processes" and "technologies". We also ensure that these security solutions are dedicated to monitoring and protecting your organization's IT assets as well as detecting, containing, eradicating and assisting in recovery from all security threats and associated incidents.

Benefits & Features

✔ Identifying risk.   ✔ Reducing risk.   ✔ Mitigating against risk
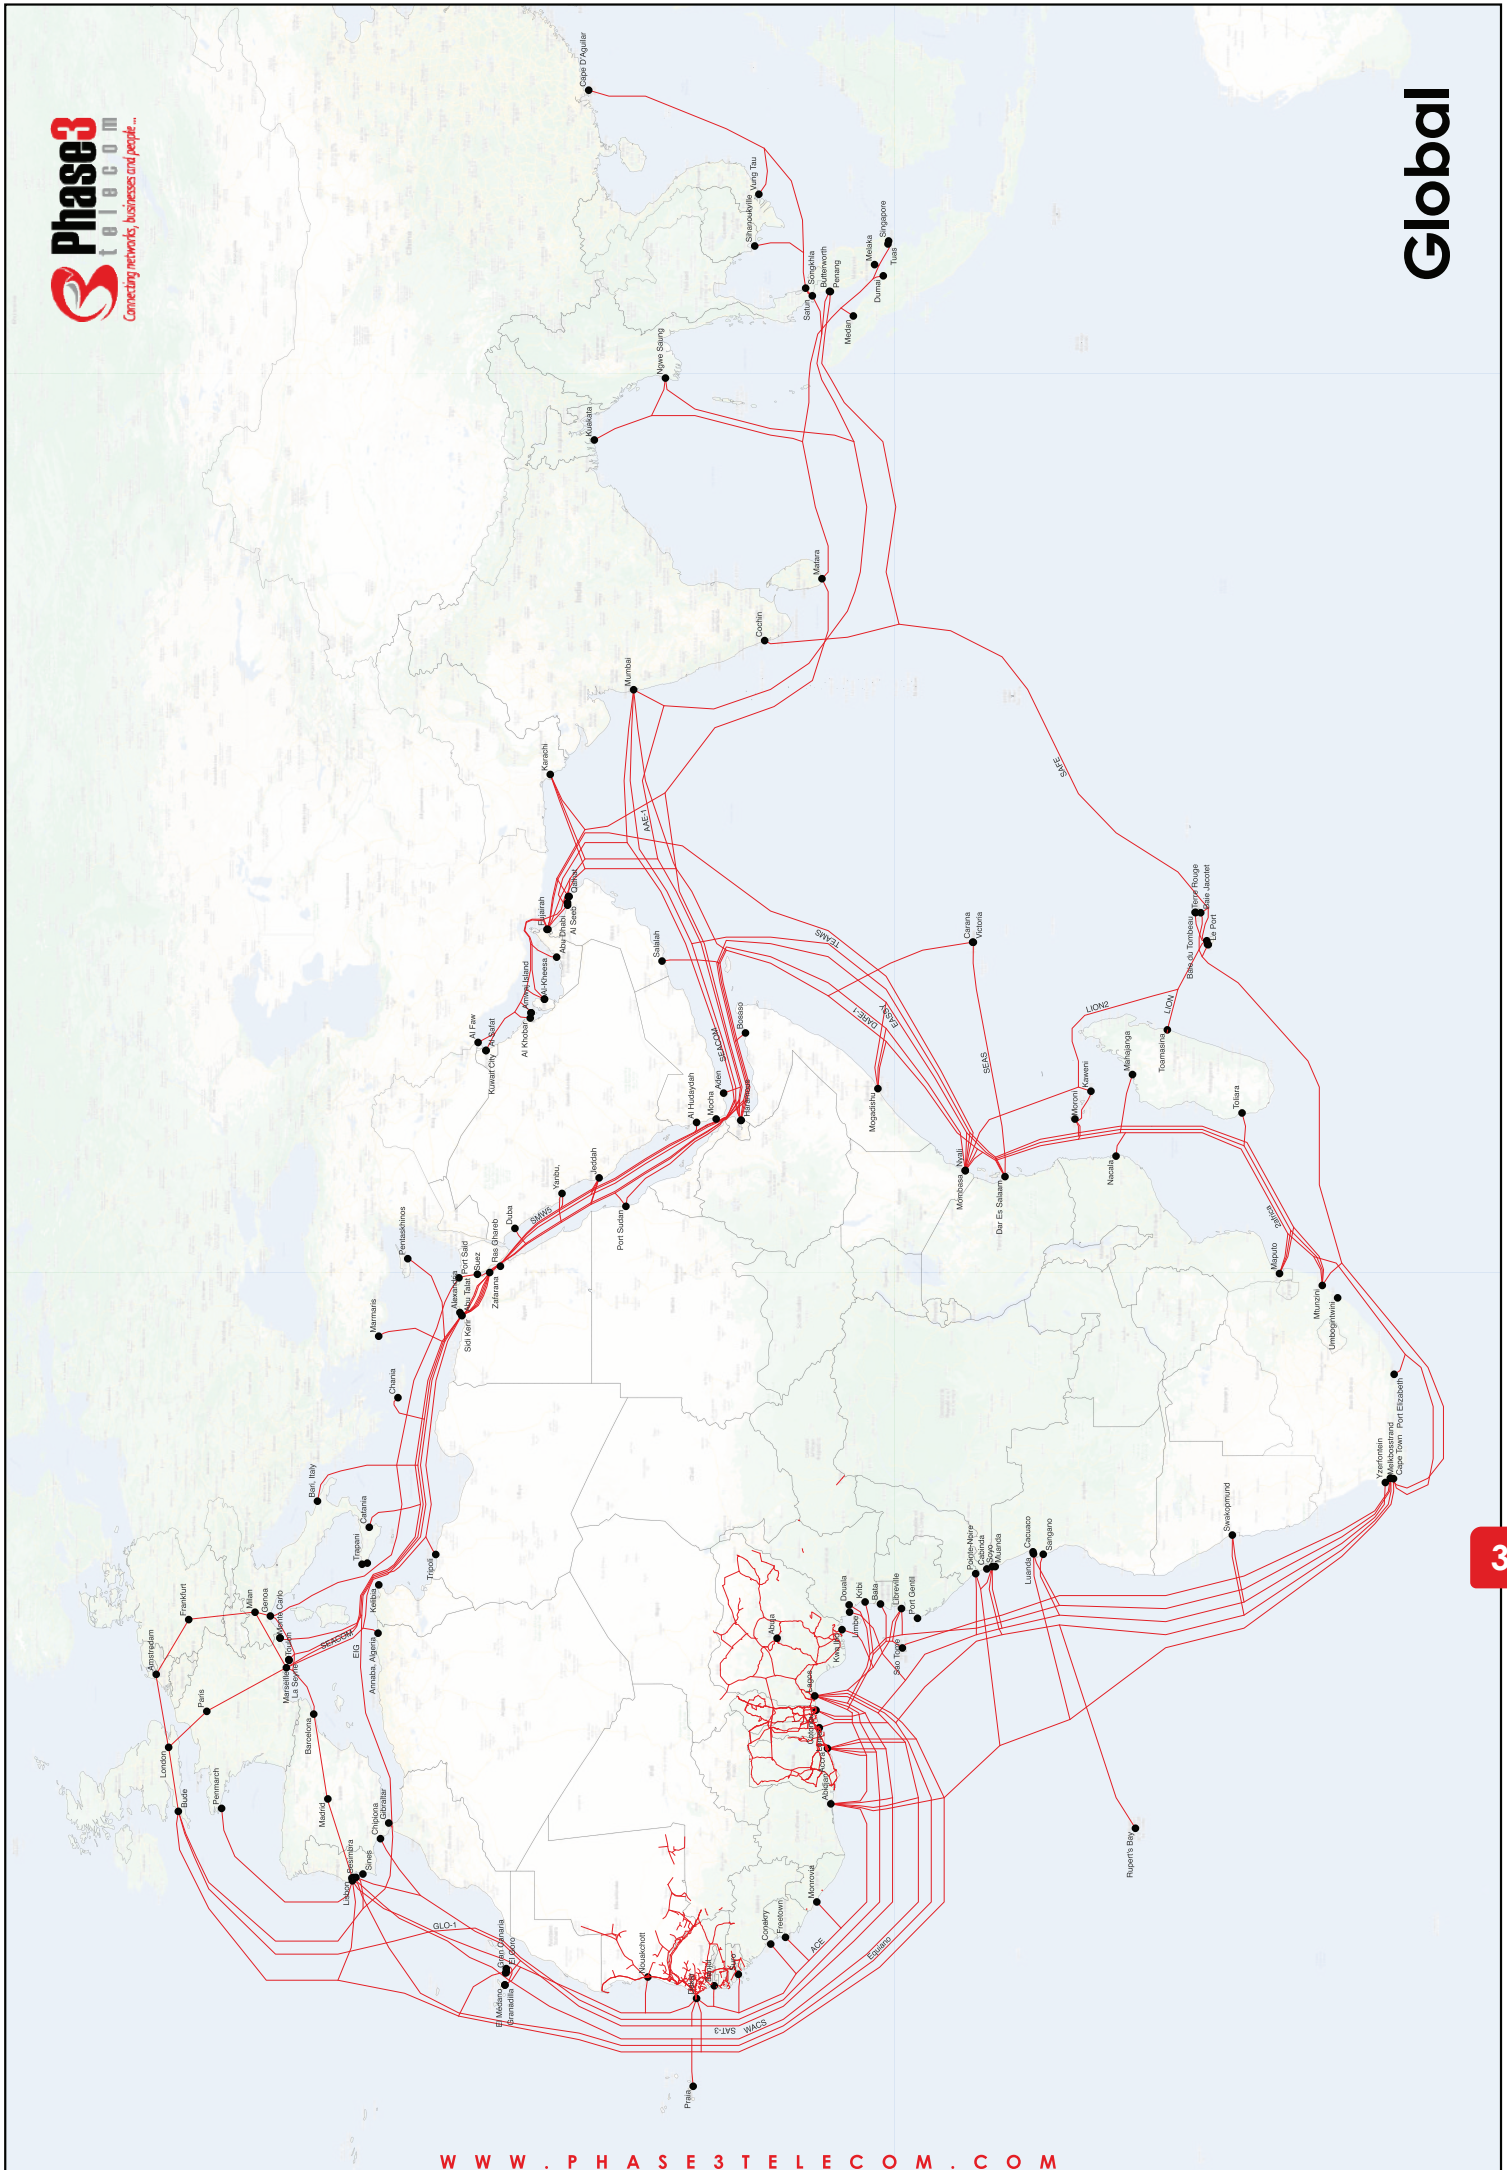

CLOUD SERVICES

Our hosting services offer innovative cloud solutions that provide a wide range of products covering business enterprises, government and non-governmental institutions. We put special premium on affordability, flexibility, scalability and security on all deployments.

With Phase 3 cloud services, businesses and agencies can run their operations from anywhere, anytime and on any device. Our professional services offering provide consultation for organizations, helping them in tailor bespoke cloud model that meet their business needs, goals and objectives.

Feel free to check with us on how we can help your digital transformation journey through our Software-as-a-service (SaaS), Platform-as-a-service (PaaS) and Infrastructure-as-a-service (IaaS) suites.

Benefits & Features

✔ Wide range of cloud products   ✔ Tailored cloud models
✔ Scalability   ✔ Support for digital transformation
✔ Security   through SaaS, PaaS, and IaaS suites
✔ Remote operations
